

Belgium's largest Sewer Rehab company Renotec NV joins IKT Association

IKT's Managing Director Roland W. Waniek welcomes Renotec NV as a new member of the IKT Association of Industry and Services (from left: Karel Janssen, Roland W. Waniek and Kristof Maesen).

We warmly welcome Renotec NV as a new member of our IKT Association of Industry and Services!

Renotec NV is Belgium's largest sewer rehabilitation company. It has more than 30 years of experience and employs 900 people.

Renotec's range of services includes the rehabilitation of gravity and pressurised mains using:

- CIPP lining
- Pipe bursting
- Short lining
- GRP lining
- Horizontal drilling

- Slip lining
- Spray mortar and grouting
- Quick-Lock
- Laterals renovation
- Manhole renovation

A warm welcome to our new member Renotec NV from Belgium!

More about Renotec's activities here: [Renotec NV](#)

Renotec NV is the first Belgian member of the non-profit IKT Association of Industry and Services.

The association pools the extensive expertise of manufacturers, rehabilitation companies and engineering consultancies in the wastewater sector and contributes it to the work of the IKT – Institute for Underground Infrastructure.

The IKT Association of Industry and Services is also a shareholder of IKT. It holds one third of the shares and is represented by two members on the Supervisory Board.

The second shareholder of the IKT is the IKT Association of Network Operators, which holds two thirds of the IKT shares. Around 160 municipal urban drainage operators belong to this organisation.

You can see which other companies are members of the IKT Association of Industry and Services here: [Member companies](#)
