

# Education

## Advanced vocational training

Get ahead with training from IKT

Over the years, IKT has acquired a reputation as an institution for advanced vocational training. This includes the certification of consultants and sewer leak tightness inspectors. To get more information about IKT's training (in German) please visit: [www.ikt.de](http://www.ikt.de)

## Education-To-Go

In 2013 IKT teamed up with IRWA, the International Right of Way Association (USA), to develop joint courses and certification programs on "Managing the Crowded Underground". Read more about IRWA

The same year a first series of webinars started successfully focussing on water related issues of asset management of underground infrastructure. Most of these sessions are available via youtube and you can follow them for free! IRWA/IKT members are also entitled to obtain all presentations as pdf-files via IRWA University.

## **XXXHallo Herr BosselerXXX**

Wie kommen unsere Mitglieder an die PDF's? Ich hab jetzt einfach mal IRWA Univerity stehen lassen, aber das war ja für irwaonline.org gedacht.

Sollen Mitglieder via e-mail die Dateien anfordern können? An wen sollen die E-Mails gehen? An Lutz – als "Mitglieder-Betreuer"? Oder sollen wir eine Bestell-PDF hinterlegen? So mit Ankreuzmöglichkeit

Ich bin Mitglied im

Förderverein Netzbetreiber

Förderverein Wirtschaft

KomNetGEW

Erfahrungskreis Kanalbetrieb

kein Mitglied, gegen eine Gebühr von xx Euro bestelle ich hiermit die Datei

Oder haben Sie noch eine ganz andere Idee?

## **IRWA/IKT Webinar "Asset Management of Underground Infrastructure"**

(Water focus – recorded 2013-2014)

### **Session GERMANY**

Introduction – Experience from Germany

IKT and IRWA introducing their webinar series. Manfred Fiedler from Göttingen presenting his famous Infrastructure Management Strategy for Göttingen Utilities and City Planning for the first time to an international audience.

Watch session via youtube

## **Session FRANCE**

Olivier Thépot from Eau de Paris, France, presents current issues and solutions for the Paris underground sewer systems. The presentation is accompanied by live videos from IKT's testing hall showing the MAC-device for inspection of large underground conduits and sewers.

Watch session via youtube

## **Session US-WERF**

Connecting North America and Europe

Walter Graf (WERF) and Sunil Sinha (Virginia Tech) presenting results from WERF Asset Management projects and introducing WaterID, a platform for the exchange of water relevant data.

Watch session via youtube

## **Session NETHERLANDS**

Francois Clemens, Professor at Delft University, presenting research results on infrastructure management with a focus on inspection and hydraulics of sewer and drains.

Watch session via youtube

## **Session INTERNATIONAL**

European and US experts presenting their experience on “Vegetation and Infrastructure” interacting in a joint webinar session from Germany and California.
